**INNOVATION
THAT MATTERS**

Applications

- ◆ Room and Pillar
- ◆ Stope and Pillar
- ◆ Pillar Removal
- ◆ Mine Development
- ◆ Underwater Construction

RED D

Designed to Meet Customers Needs

The Red D Miner system was designed to overcome our customers' challenges and meet their needs.

1. Adaptability to varying prime movers and mining methods

- **Product Pump Assembly:** Incorporates pump-specific safety system
- **Water Pump Assembly**
- **Control Station:** Interface and hydraulic control
- **Custom Product and Water Tanks**
- **Hose Reel** (optional)

2. Reliability in harsh underground conditions

- **Extremely rugged** mobile electro/hydraulic controls
- In the event of a breakdown, the needed item can **be there the next day**

3. Affordability in initial purchase and long-term upkeep

4. Simplicity in operation

- **Basic start-up** and shut down procedures
- **Two tanks** to fill at the beginning of the shift (product and water)
- **Four function remote** (start, stop, hose reel in and out)
- Electronics kept to a **minimum**
- Operator function **without supervision** after one day of training
