IMPERIAL AVALAUNCHER

The **Imperial Avalauncher** explosives charge delivery system is meticulously engineered to meet the most critical requirements in the avalanche control industry. Avalauncher can deliver a host of explosive rounds including **Snow Launcher Classic**, **Snow Slugger**, and **Thunderbolt**.

PRODUCT OVERVIEW

TECHNICAL DESCRIPTION

The Imperial Avalauncher from Austin Powder has been specially engineered to use compressed gas to fire explosive charges for remote avalanche control work. The launcher utilizes compressed nitrogen gas for propulsion. The use of nitrogen gas allows for use in frozen conditions where moisture in the canisters cannot be tolerated. To be coupled with Austin Powder Avalanche explosive charges only. Imperial Avalauncher has CE certification for conformity to directives and regulations within the European Union.

ADVANTAGES

- May be fired using an electric remote or pneumatic switch.
- Inert rounds available for target registry.
- Made from superior stainless steel to prevent rust and corrosion.
- Easy clean out and inspection.
- 360 degree azimuth ring for easy aiming.
- Horizontal and vertical adjustments
- Mounting kits available for a variety of applications.
- Nitrogen and engineered design and CE certified.

APPLICATION RECOMMENDATIONS

- To be used by trained avalanche control personnel only.
- To be used with Austin Powder approved rounds.
- Use of avalanche control explosives should align with a avalanche control plan for the application.
- Contact Austin Powder for more information.
